

Michael Matheidas
ExxonMobil Production Company

After graduating with a B.S. of Mechanical Engineering from Texas A&M University in 1995, Michael worked at an engineering contracting company designing hydrocarbon facilities as well as a short stint in manufacturing with Compaq Computer. He joined ExxonMobil in 2002 and currently has over 20 years of experience working in the Upstream industry. The majority of his experience has been focused on machinery system design, start-up, and operations. Michael's roles have included major projects, producing affiliates onshore and offshore, as well as Upstream Research and has been privileged to live in five different countries. He is currently a Regional Facilities Advisor who is responsible for technical and business development support to upstream partners in the Asia Pacific, Middle East and Caspian regions for ExxonMobil.
